

Anthony C Nyanplu

Contact: +1(763)-910-1311 / Anthonynyanplu76@gmail.com

Address: [Minnesota, USA](#)

Professional Summary

I am a result-driven Electronic Engineering Technology student skilled in CAD, Circuit Stimulation & Analysis, and Microprocessor Engineering. I am also proficient in MATLAB, C++, and Python Languages, with hands-on experience in Automation, CNC Laser Operator, Quality Management System, and Field Technician. Recognized for enhancing production workflows and troubleshooting complex systems in medical and industrial applications. Moreover, I am passionate about leveraging academic and professional expertise to contribute to innovative engineering solutions.

Professional Skills

Technical: Field Technician, Lean Manufacturing, CNC Laser Operator, Production Operator

Hardware: FPGA Design, Power Electronics, Operational Amplification, Embedded System

Software: C-Language, Python, VHDL, Keil uVision, Fusion 360, KiCad, NI-Multisim, Visual Studio Code

Professional Experience

CNC Laser Operator

TE Connectivity | July 2023 – December 2024

- Operated and programmed CNC laser systems to produce precision components per technical specifications.
- Enhanced production efficiency by optimizing laser settings, reducing cycle times by 80%.
- Implemented process improvements, leading to 85% reduction in material waste.

Automated Machine Operator IV

Medtronic | May 2022 – April 2023

- Operated automated machinery to ensure consistent production of high-precision implants.
- Reduced machine downtime by 85% through timely adjustments and proactive maintenance.
- Maintained 100% compliance with quality standards by leveraging ERP systems for production tracking.

Field Technician

Scandinavian Designs | October 2021 – May 2022

- Diagnosed and resolved equipment malfunctions on-site, achieving a 98% first-time resolution rate.
- Utilized technical manuals and schematics to troubleshoot complex systems efficiently.
- Managed tool inventory, ensuring operational readiness for field assignments.

Medical Device Assembler

Boston Scientific | January 2019 – August 2021

- Applied Lean Manufacturing principles to optimize production processes, reducing defects by 95%.
- Trained 10+ team members on quality control protocols, achieving consistent quality standards.
- Used SPC to monitor specifications, maintaining 100% compliance with production benchmarks.

Education

Bachelor of Science in Electronic Engineering Technology

Minnesota State University, Mankato | MN 56001

Anticipated Graduation: December 2026

Relevant Coursework: Electronic CAD | Microprocessor | Integrated Computer Technology | Engineering Economics | Quality Management System | Operational Amplifier | Electronic II | Industrial Automation.
