

Anthony C Nyanplu, BSC

Electrical Engineering Technology | Lean Manufacturing | Field Technician | IV Machine Operator

USA, Minnesota | Anthonynyanplu76@gmail.com | 763-910-1311 | Portfolio Link: https://anthonynyanplu.github.io/Portfolio_Pro/

PROFESSIONAL SUMMARY

Results-driven Electronic Engineering with 6+ years of experience with Medical Device Manufacturing. Skilled in partnering with cross-functional teams to build high-quality, compliant products while supporting lean manufacturing, process improvement, automation implementation and equipment repair.

AREA OF EXPERTISE & PROFESSIONAL SKILLS

CAD Modeling & Assemblies | Autodesk Fusion 360 | CAD Model Review | Technical Documentation
3D Printing / STL Prep | Design for Manufacturing | PLC Ladder Logic | Embedded C/C++ & MCU
KiCad & NI Multisim | Circuit Design & Analysis | Quality Inspection | Root Cause Troubleshooting

PROFESSIONAL EXPERIENCE

CNC Laser Operator

TE Connectivity | Plymouth, MN | October 2025 – December 2026

- Operated and programmed CNC laser systems to produce precision components per technical specifications.
- Enhanced production efficiency by optimizing laser settings, reducing cycle times by 80%.
- Implemented process improvements, leading to 85% reduction in material waste.

Automated Machine Operator IV: Lithium Battery Manufacturing

Medtronic | Brooklyn Park, MN | August 2024 – June 2025

- Operated automated machinery to ensure consistent production of high-precision implants.
- Reduced machine downtime by 85% through timely adjustments and proactive maintenance.
- Maintained 100% compliance with quality standards by leveraging ERP systems for production tracking.

Field Technician

Scandinavian Designs | Roseville, MN | August 2022 – May 2024

- Assembled, troubleshooted and repaired products by achieving a 98% first-time resolution rate.
- Diagnosed technical problems using manuals and schematics to restore functionality with minimal delays.
- Strengthened customer satisfaction by delivering professional and accurate on-site service support.

Medical Device Assembler

Boston Scientific | Maple Grove, MN | January 2019 – July 2022

- Applied Lean Manufacturing principles to optimize production processes, reducing defects by 95%.
- Trained 7+ team members on quality control protocols, achieving consistent quality standards.
- Used SPC to monitor specifications, maintaining 100% compliance with production benchmarks.

EDUCATION

Bachelor of Science in Electrical Engineering Technology

Minnesota State University, Mankato | Mankato, MN

ENGINEERING PROJECT

Automatic Drink Filling System - CAD, PLC & Motion-Control Prototype: Built Fusion 360 assembly for turntable, PLC stand, mounting plates, fastener layout and 3D-printable parts; integrated CLICK PLC, Arduino, NEMA-17/DM542, sensor and pump control.

AC Current Sensor Signal Conditioning PCB - KiCad/Multisim: Designed ACS712 board concept to convert AC sensor output into a 0-3 V ADC-ready signal with schematic flow, component selection, simulation plan and validation approach.
